Activities & Achievements

Currently enrolled on the University of Birmingham full stack developer coding course (6 months). Developing front and back-end coding skills; working alongside other aspiring developers on multiple projects in an aim to gain more experience and refine existing skill; this course has also helped improve attention for detail and organisation.

Extracurricular activities such as volunteering at the Queen Alexandra College (QAC) sight village conference the role included helping the visitors around the conference and helping them understand the different technology that was presented to them to help aid them in everyday life. While helping guide the visitors we learnt how to effectively communicate and gained knowledge on key health and safety standards used to keep staff and visitors safe.
